

# Carnegie Magazine Index - 1977

The annual index for volume LI, ten issues of *Carnegie Magazine* published in 1977 (not published in July or August). In September *Carnegie Magazine* was made available at newsstands and bookstores, and the system of pagination used for fifty years was altered. The traditional system of 1-480 consecutive pages per year was replaced by a system which begins each

issue with page 1. The index reflects this change. Issues from January through June are indicated by references to pages 1-288. Issues from September through December begin with an abbreviation for the month, and then the page number. September = S, October = O, November = N, and December = D.
